waseemmdjob@gmail.com Hyderabad

Over 2+ years of experience as a full stack Developer and coding using Python, Django. Hands on experience in developing backend API using Python. Hands on experience in MySQL database. Good Knowledge of Objected Oriented Concepts and developing and deploying scalable web applications.

Results-driven Angular and Full-Stack Developer with over 2 years of experience in developing and deploying scalable web applications. Skilled in Angular, TypeScript, Flask, and Fast API, with expertise in reusable UI components, API integration, and microservice architectures. Strong background in debugging, CI/CD, and front-end optimization. Committed to delivering efficient, secure, and user-centric digital solutions

TECHNICAL SKILLS:

- **Programming Language** : Python, Java Script, Html, CSS
- **Web Frameworks** : Django, Fast Api, Angular.
- **Database** : SQL, MySQL, MangoDB
- **ORM** : SQL Alchemy, Django ORM
- **API Development** : RESTful APIs
- **Version Control** : Git
- **IDE/Building Tools** : PyCharm, IDLE, Visual Studio
- **Front-end** : HTML, CSS, JavaScript
- **Operating System** : Linux, Windows
- **CI/CD** : Jenkins

WORK EXPERIENCE:

- Having 2+ years of hands-on Experience in IT.
- A dedicated and result-oriented IT professional possessing a passion for programming and seeking a software engineer position with ABC International company to make the most of my coding skills and leverage the goals and ambitions of the organization.
- A motivated individual with in-depth knowledge of languages and development tools, seeking a position in a growth-oriented company where I can use my skills to the advantage of the company while having the scope to develop my own skills.
- To work as a Software Engineer applying my knowledge in the field of testing, designing, and maintenance to cater to the specific needs of the people. I wish to work in a team of motivated individuals who wish to work towards the advancement of the company and its goals.

- requirements of clients and customers into hi-tech and reliable software. Excellent knowledge of software design and development with 2+ years of work experience as software developer.

PROJECT DETAILS:

PROJECT 1 -: Ecommerce Web Application: (Junior Software Engineer)

VSoft Technologies

ROLES AND RESPONSIBILITIES:

- Developed and maintained the backend functionality of an e-commerce web application using Django framework.
- Designed and implemented database models and relationships, ensuring efficient data storage and retrieval for improved performance.
- Implemented RESTful APIs to facilitate communication between the frontend and backend, allowing seamless integration of user interfaces.
- Developed and integrated authentication and authorization mechanisms, ensuring secure access to sensitive information and resources.
- Designed and implemented product catalogue management functionality, including product creation, modification, and deletion.
- Implemented search and filtering functionalities to enable users to find products based on specific criteria.
- Developed and integrated shopping cart functionality, allowing users to add, update, and remove items for purchase.
- Implemented order management system, including order processing, tracking, and fulfilment.
- Designed and implemented APIs for external services integration, such as shipping providers and inventory management systems.
- Collaborated with frontend developers, designers, and other stakeholders to define API specifications and ensure smooth integration.

Project Name	Ecommerce Web Application
Client	Zappos
Technology	Python, Django, Django Rest frame work, Angular
Software	Languages: Python, SQL Database: MySQL Tools: Visual Studio
Role	Python Developer

PROJECT 2 – Hospital Management System: (Junior Software Engineer)

VSoft Technologies

ROLES AND RESPONSIBILITIES:

- The purpose of the project entitled as “Hospital Management System” is to computerize the Front Office Management of Hospital to develop software which is user friendly simple, fast, and cost effective.

- It deals with the collection of patient's information like add patient, update patient, delete patient, search patient, view patient diagnosis, etc. Traditionally, it was done manually.
- The main function of the system is register and store patient details and doctor details and retrieve these details as and when required and to manipulate these details meaningfully.
- The Hospital Management System can be entered using a username and password. It is accessible

  by an Admin, Doctor & Receptionist. Only they can add data into the database. The data can be retrieved easily. The data are well protected for personal use and makes the data processing very fast.
- The project Hospital Management system includes registration of patients, storing their details into the system by using database. The software has the facility to give a unique id for every patient and stores the details of every patient and the staff manually. Admin can view availability of a doctor and the details of a patient using the name, id.
- Computers are not only used to increase the efficiency in all fields ranging from fixing the appointment with the Doctor to keeping the record of the patient.

Project Name	Hospital Management System
Client	The Royal Brisbane and Women's Hospital
Technology	Python, Django, Django Rest frame work, Angular
Software	Languages: Python, SQL Database: MySQL Tools: Visual Studio
Role	Python Developer

QUALIFICATION:

- B.Tech in Electrical and Electronics Engineering – St. Peter's Engineering College, Hyderabad

PERSONAL INFORMATION:

- **Date of birth** : 30 November 1998
- **Marital status** : Single
- **Nationality** : Indian
- **Languages Known :** Telugu, English, Hindi, Urdu

DECLARATION:

I hereby declare that the above-mentioned data are true to the best of my knowledge and belief.
